Profile

I am a graduate of Vocational High School (SMK) with expertise in Mechanical Engineering. Have professional experience in the field of electronic services, network installations such as CCTV, WiFi internet, and PABX. In addition, I have also been involved as a clinical laboratory technician and have experience in website development (web developer). With a diverse technical background and a high commitment to work quality, I am ready to provide the best contribution in a dynamic and professional work environment.

Work Experience

Medical Laboratory Technician

CV Berliando Central Medika | August 2023 - January 2025

- Ensured quality control by performing routine maintenance on lab equipment and calibrating instruments as needed.
- Repairing Clinical Laboratory Equipment Such as Hematology Analyzer, Photometer, Centrifuge, Chemistry Analyzer
- Carrying out sales/purchase transactions for medical equipment and reagents

Fullstack Programmer - SIMRS

CV Solusi Digital | May 2022 - August 2023

- Building a Hospital Information System (SIMRS) application with PHP Codeigniter 4, MySQL, Javascript.

Fullstack Developer - Digital Scoring

Jago Event | Februari 2022 - May 2022

Building a Pencak Silat Match System application with PHP Codeigniter 4, MySQL, Javascript. In order to make a match efficient and open, it is our motivation to build this application. This application includes registration, management system, and during the match, the audience can see the assessment input by the jury directly.

Electronics Technician

Khiatphone | January 2019 - May 2022

- Monitored and tested equipment performance to diagnose and resolve problems.
- Reset and restored mobile operating systems such to factory default settings to correct software-based faults.
- Improved client security by installing and maintaining CCTV, PABX, LAN systems in residential and commercial properties.
